

Conwy & Denbighshire PSB = Place - Environmental Resilience

Timeframe	Next steps to explore	Actions Identified from Workshop (July 2018)		5 ways of working	Organisational leads	Timescales
Short Term 1-5 years	Ensure we have communities that understand the value of the natural environment & how they can positively contribute.	a.	Community Pledges			
		b.	Mapping and sharing of good practice			
	Focus on sustainable procurement and local produce.	c.	Community Pledges			
		d.	Common environmental standards			
		e.	Collaborative discussions needed on the community benefits gained from development e.g. S106			
	Promote the importance of addressing environmental issues e.g. recycling, energy efficiency, and carbon emissions.	f.	Common environmental standards			
		g.	Collaborative discussion needed on the 'conflict' between planning policy and environment issues			
	Improve the energy efficiency of our buildings	h.	Common environmental standards			

Medium Term 1-15 years	Have communities which are better prepared for weather extremes.	i.	Check corporate plans – e.g. flood wardens			
		j.	Invited Local Development Plan (LDP) Managers to discuss planning policy (September PSB meeting)			
	Produce less waste.	k.	Common environmental standards			
		l.	Community pledge			
		m.	Lobbying for producer responsibility			
	Work at a community level to better green infrastructure that can improve both the natural environment and community well-being.	n.	LDP			
Be seen as leaders for sustainability such as supporting the development of community lead renewable energy schemes.	o.	Community Pledges				
	p.	Common Environmental standard				
Long Term 1–20 years	Encourage a thriving and resilient natural environment where wildlife flourishes.	q.	Lobbying for: <ul style="list-style-type: none"> Greater focus and priority on the impact of rising sea level and interventions needed embedding government sustainability legislation into planning policy 			

			<ul style="list-style-type: none">• Aligning building regulations to zero carbon wales ambition• Investment in green infrastructure (e.g. active travel improvements, electric car charging points, microgeneration)• Improving flexibility and sustainability of grant funding• Reducing excess packaging and single use products – more pressure on producer responsibility / introduce levy (e.g. plastic bags)• Managing existing landscape for biodiversity• Sustainable procurement
