#### **Please see photos on main presentation.**

At the time of writing it can be confirmed that the terms of a s.106 have now been agreed (draft) between DCC and the applicants. The applicants are now considering the issue of security. This may be in the form of a bond or a deposit (either as security or a fund to draw down from) which can be used by DCC to carry out works to the Listed Buildings should development not proceed as planned.

The applicants have always maintained communication with DCC in an attempt to finalise the legal agreement. They have invested a lot of time and money to date in getting this scheme together and are committed to carrying out the development. To this end Officers did not feel it necessary to seek a different resolution from Committee whilst negotiations were on-going on

the s.106. The signing of the s.106 is now imminent with safeguards in place to ensure works are carried out to the Listed Buildings at the earliest opportunity in accordance with the phasing of the development. Officers will further update local Members on the signing of the agreement providing more definite time scales on the proposed works in due course. From discussions with the applicant's solicitors it is not anticipated that there will be any further delay in making a start on site as it is not to their commercial advantage to do so.
