Draft "Seagull" Action Plan

Proposed Action	Comment	SLT Conclusion
Do Nothing	The Council currently has no agreed	Consensus that there is an
-	corporate approach. It is not a matter for	issue and that
	1 Service. There is currently no budget	reasonable/proportionate/low
	specifically allocated to dealing with	cost actions should be
	seagulls.	implemented covered by
		existing Service budgets.
Introduce a long term programme of culling (shooting,	No in-house resource. Would need to employ specialist contractors.	No support for this approach.
poisoning, trapping	Costs would be significant given the	
& disposing etc)	intensity and period of time.	
	Licensed required from WG	
	Impact of culling not proven (eg new birds	
	move into the area to replace those culled)	
	Inhumane and open to criticism	
Introduce a long	No in-house resource. Would need to	No support for this approach
term programme of	employ specialist contractors.	based mainly on cost and
destroying	Control of the stratification of the	limited impact.
nests/eggs, replace	Costs would be significant given the	
with "dummy" eggs etc.	intensity and period of time.	
etc.	Licensed required from WG	
	Some evidence that some positive	
	impacts on population and behaviour.	
	Inhumane and open to criticism	
Introduce a by-law	Could be added to other Env/ASB	SLT not particularly supportive
or Public Space	offences such as dog fouling, littering etc.	but concluded on seeking the
Protection Order (PSPO) preventing the feeding of gulls	(feeding birds is NOT littering)	views of Scrutiny as to whether or not to carry out a
	No evidence there is a particular problem	formal public consultation
	of people feeding the gulls	exercise.
	Difficult to enforce (eg people feeding	Lead Service; Planning &
	gulls on private land, out of hours etc)	Public Protection
	Other Authorities have received	
	objections based on human rights as	
	certain religions promote the feeding of	
Introduce variety of	birds Possible methods include loud bangs, play	Could be deployed in known
methods to "scare"	distress calls, introduce moving apparatus	problem areas.
ctilous to start	alstress cans, introduce moving apparatus	p. objetit dread.

birds in certain problem areas	(eg "angry bird" ballons), use of live hawks etc.	Lead Service; Highways & Env
	May discourage birds in areas deployed, although they will only move nearby and the impact is short lived	
Introduce netting/bunting over public spaces	Limited locations where this could introduced	Could be deployed in known problem areas.
	May require permission from private properties	Lead Service; Highways & Env
Discourage "perching" in public realm	Ensure street furniture such as lampposts have spikes etc to prevent perching	Already a consideration and is done.
	Limited impact	Lead Service; Highways & Env
	Too expensive to retro fit	
Adapt existing Council buildings to help make them seagull proof	Introduce netting over roofs, spikes on window ledges etc at Council buildings such as offices, schools etc.	Officers to consider adaptation and capital funding on those buildings were there is an accepted problem.
	Potentially very expensive and therefore only to be considered at extreme "problem" buildings	Lead Service; Property (+ Service responsible for building eg if a school, education)
Design new Council buildings to help make them seagull	Have a design criteria on all new Council buildings to consider preventing nesting/perching	New Council Policy to ensure this is done.
proof		Lead Service; Property
Introduce Supplementary	Introduce "best practice" to "design out" gulls from new buildings (private sector).	Report to LDP Steering Group.
Planning Guidance (SPG) to encourage all new buildings to consider being seagull proof at the design stage	Probably not always enforceable at the planning decision stage, as only guidance.	Lead Service; Planning & Public Protection
Reduce availability	Ensure our public realm bins are seagull	Officers to have regard to
of waste food through Council	proof.	these factors and seek improvements as possible
refuse collection	Encourage all households to recycle all	
	food in appropriate containers.	Lead Service; Highways & Env
	Remove all bin bags from normal collection	
Reduce the	Ensure food business premises dispose of	Officers to do more with food
availability of waste	their waste food appropriately and in	business premises to reduce
food at food business premises	seagull proof containers Work with food business to suggest ways of limiting food litter and where necessary	food litter and availability of waste food for the gulls.

	more enforcement of the fast food litter legislation.	Lead Service; Highways & Env and Planning & Public Protection (food hygiene)
Have an ongoing campaign to educate the	Concerted PR campaign run every year to encourage none feeding of gulls, gull proofing properties, less food waste etc	Officers to put together a PR campaign.
public/businesses		Lead Service;
not to feed gulls and to take more	Provide leaflets for display in food business premises regarding not to feed	Communications & Marketing
responsibility to deal with gull nests on their property	the gulls and to take care when eating in the open	Signs to be erected around relevant towns "do not feed the gulls".
		Lead Service; Highways & Env and Planning & Public Protection
		Adverts for food business premises.
		Lead Service; Planning & Public Protection
Lobby WG, WLGA	Seek a more consistent national approach	Lead Member to write to
and NRW to make		relevant organisations.
the issue more of a		
national or at least		Lead service; Planning &
regional campaign		Public Protection
