

Climate and Ecological Change Strategy and Action Plan

Well-being Impact Assessment Report

This report summarises the likely impact of the proposal on the social, economic, environmental and cultural well-being of Denbighshire, Wales and the world.

Assessment Number:	802
Brief description:	The Climate and Ecological Change Strategy and Action Plan seeks to get the Council to net carbon zero and ecologically positive by 2030. The strategy will contain a set of existing and new policies across the range of Council services and operations that are supportive of low carbon, increased carbon sequestration and biodiversity improvement. The action plan will cover the years 2021/22 – 2029/30 and outline the projects the Council intends to deliver, subject to the securing of the necessary funds, to work towards achieving our net carbon zero and ecologically positive Council goals. Note: The scope of the strategy and action plan is council owned emissions and council owned land- coverage isn't the whole of Denbighshire as a geographical county.
Date Completed:	26/08/2020 17:06:10 Version: 1
Completed by:	Helen Vaughan-Evans
Responsible Service:	Business Improvement & Modernisation
Localities affected by the proposal:	Whole County,
Who will be affected by the proposal?	- DCC Staff - DCC Councillors - DLL Staff - Schools - Those who use our buildings - Those who use our vehicles (fleet car, pool cars etc) - Our supply chain - Shared Services - Those who use or would like to use our open green spaces - Wildlife - DCC Volunteers - Residents, visitors, businesses, landlords who may use a more 'green' service from us in the future.
Was this impact assessment completed as a group?	No

IMPACT ASSESSMENT SUMMARY AND CONCLUSION

Before we look in detail at the contribution and impact of the proposal, it is important to consider how the proposal is applying the sustainable development principle. This means that we must act "in a manner which seeks to ensure that the needs of the present are met without compromising the ability of future generations to meet their own needs."

Score for the sustainability of the approach

★ ★ ★ ☆ (3 out of 4 stars) Actual score : 27 / 30.

Implications of the score

We have scored high in the collaborative approach to strategy and action plan development and delivery being undertaken internally across the Council and also with the public.

The strategy and action plan could score higher in relation to prevention by broadening the scope to include climate change adaptation. Although this is not intended at this time.

The strategy and action plan take a long term view, with actions for 10 years leading up to 2030, with influence and benefits realised beyond that period.

Summary of impact

Well-being Goals

A prosperous Denbighshire

A resilient Denbighshire

A healthier Denbighshire

A more equal Denbighshire

A Denbighshire of cohesive communities

A Denbighshire of vibrant culture and thriving Welsh language

A globally responsible Denbighshire

Positive

Main conclusions

The net carbon zero and ecologically positive are 2030 goals and the DCC's Climate and Ecological Change Strategy and Action Plan is for a 9-year period 2021/22-2029/30 so it engenders long term thinking at its core. It will outline the action needed over next 9 years to ensure DCC contributes to mitigating climate and ecological change impacts now and for future generations.

Under the five delivery principles of the Well-being of Future Generations Act the developing Strategy and Action Plan scored 3 out of 4 stars (actual score 27/30). To maintain the score, it will be important to continue the collaborative and integrated approach to its development both internally across the Council and in consultation with the public.

Against the seven well-being goals of the Act, the potential impact of the Strategy and Action Plan is evaluated as 5 Positive and 2 Neutral. The strategy and action plan in its very nature of combating climate and ecological change has protecting and improving the well-being of generations now and in the future at its heart and the development and delivery of the programme will continue to maximise on the opportunities to do just that.

To ensure the realisation of this benefit, the programme should take a long term view on maintaining and managing anything that is put in/delivered/created and also to continue to involve residents and communities in delivering the Council's programme. This could include sharing learning so they themselves can deliver action to tackle climate and ecological change in their personal lives and within their communities. The Council will need to balance the ambitions of our local populous with the internal resource available.

Evidence to support the Well-being Impact Assessment

- We have consulted published research or guides that inform us about the likely impact of the proposal
- We have involved an expert / consulted a group who represent those who may be affected by the proposal
- We have engaged with people who will be affected by the proposal

THE LIKELY IMPACT ON DENBIGHSHIRE, WALES AND THE WORLD

A prosperous Denbighshire	
Overall Impact	Positive
Justification for impact	Impact is a positive one due to the direct positive impact on generating a low carbon society, the improvement in infrastructure and transport and the knock on benefits around economic development, jobs and skills.
Further actions required	It will be important to minimise any negatives around any potential reduction co-location of staff in central offices.

Positive impacts identified:

A low carbon society	<p>This strategy and action plan is all about reducing carbon and increasing carbon sequestration (carbon absorbed by Council owned and operated land).</p> <p>We will aim to reduce our carbon from our supply chain, buildings, fleet, business travel, commuting, street lighting, waste.</p> <p>Our learning will be shared with the public and partners.</p> <p>Our staff and councillor behaviour will be encouraging for low carbon both professionally and personally.</p>
Quality communications, infrastructure and transport	<p>Investment in our buildings to reduce carbon will increase the quality of them.</p> <p>Investment in low carbon transport and travel to support staff and councillors to choose low carbon travel options.</p> <p>Protection, restoration and creation of green spaces to provide infrastructure for well being.</p>
Economic development	<p>Leveraging environmental benefit in local communities via procurement and engagement with our supply chain.</p> <p>Low carbon purchasing may increase spend in more local suppliers.</p>
Quality skills for the long term	<p>It is proposed to invest in carbon literacy training for staff and councillors which would improve their skill and knowledge.</p> <p>Carbon sequestration and ecological improvement projects will provide volunteer opportunities for existing volunteers and new.</p>
Quality jobs for the long term	<p>The strategy and action plan will be delivered as a programme and will create 2 new job roles and generate work for existing staff within project management.</p> <p>The programme will target the securing of external funding which will create jobs to deliver those particular projects/initiatives.</p>
Childcare	<p>Encouragement and strengthening of flexible working for staff and councillors will enable positive choices for staff in making work work around other responsibilities.</p>

Negative impacts identified:

A low carbon society	No negative impacts. This strategy and action is all about reducing carbon and increasing carbon sequestration.
Quality communications, infrastructure and transport	There may be a reduction in the number of buildings the Council own and operate in the County which potentially could impact on the footfall of people supporting rural towns.
Economic development	Reducing travel potentially impacting footfall in local town locations.
Quality skills for the long term	Potential automation or/and reduction of some tasks, loss of those skills.
Quality jobs for the long term	Potential risk that these 2 new jobs will be temporary in nature if predominately externally funded.
Childcare	N/A

A resilient Denbighshire

Overall Impact	Positive
Justification for impact	<p>The Strategy will contain policies to reset the default in favour of low carbon, increasing carbon sequestration, protecting and restoring biodiversity and creating resilient ecosystems.</p> <p>It will contain projects to deliver specific improvement actions.</p> <p>A biodiversity enhancing approach is often a more hands off approach with associated revenue savings. Similarly the reduction of energy and fuel consumption will reduce cost.</p>
Further actions required	A holistic view around carbon reduction is required to ensure any unintended consequences are avoided in terms of deliberate action taken. Read across from the strategy to work being undertaken in the sphere of climate change adaptation will be required. Taking a whole life cost approach to projects and procurement decisions will be important and ensuring maintenance/management costs of any new green spaces is properly explored and reduced as much as possible via appropriate land management choices.

Positive impacts identified:

Biodiversity and the natural environment	<p>The Strategy will contain policies to reset the default in favour of protecting and restoring biodiversity and creation resilient ecosystems.</p> <p>It will contain projects to deliver specific improvement actions.</p> <p>A biodiversity enhancing approach is often a more hands off approach with associated revenue savings.</p>
Biodiversity in the built environment	<p>The Strategy will contain policies to reset the default in favour of protecting and restoring biodiversity and creation resilient ecosystems.</p> <p>It will contain projects to deliver specific improvement actions.</p>

<p>Reducing waste, reusing and recycling</p>	<p>The Strategy will contain policies to support the reduction of waste and the increase in reuse and recycling.</p> <p>It will contain projects to deliver specific improvement actions in these areas.</p> <p>Reducing carbon in our supply chain should also support reducing waste as whole life costing will discover products/services which have a longer operating life.</p>
<p>Reduced energy/fuel consumption</p>	<p>The Strategy will contain policies to reset the default in favour of low carbon .</p> <p>It will contain projects to deliver specific improvement actions to reduce energy use in our buildings and fuel consumption in our fleet. It will also target reduction of energy and fuel consumption in our business travel and staff commuting.</p> <p>Energy/fuel reduction project not only reduce carbon but also reduce cost through reduced consumption.</p>
<p>People’s awareness of the environment and biodiversity</p>	<p>The strategy and action plan has been and will continue to be developed in consultation and engagement with the public.</p> <p>Opportunities to continue the discussion and debate with the public will be taken via online discussion forums on our county conversation portal.</p> <p>Opportunities will be taken to include learning from our work into school eco committees, geography curriculum, youth forums.</p> <p>Biodiversity and carbon sequestration projects could involve volunteers and will create spaces for nature and focus for awareness and education.</p>
<p>Flood risk management</p>	<p>Contributing to the reduction of carbon and mitigate the impacts of climate change will contribute to not making the flooding situation worse from rain and weather events.</p> <p>Opportunities will be taken to link the carbon sequestration and ecological improvement agendas to reducing surface water, fluvial and coastal flooding e.g. upland management (tree planting), installation of urban rain gardens.</p>

Negative impacts identified:

<p>Biodiversity and the natural environment</p>	<p>Need to ensure if we create any new woodlands for example that management plan is deliverable in terms of capability and capacity.</p>
<p>Biodiversity in the built environment</p>	<p>Need to ensure any Green Infrastructure installed is fit for purpose and properly maintained</p>
<p>Reducing waste, reusing and recycling</p>	<p>Products that have a longer life may cost more upfront but cost less over the lifetime of the product.</p>
<p>Reduced energy/fuel consumption</p>	<p>Ensure that reducing energy/fuel use in one area doesn't increase energy/fuel use in another e.g. reducing business travel and staff commuting by more home working which increases carbon generated in the home over and above what is saved.</p>
<p>People’s awareness of the environment and biodiversity</p>	<p>The scope of the strategy and action plan is council owned emissions and council owned land- coverage isn't the whole of Denbighshire as a geographical county.</p> <p>Use of the online Y Portal only could preclude those lacking in digital skills and connectivity the opportunity for further engagement on the development of future projects under this proposal.</p>

Flood risk management	<p>This strategy is about carbon reduction and climate mitigation rather than focused on climate adaptation which as the very least needs to be mentioned.</p> <p>Collaborative working with Flood Risk Management to understand the environmental and broader climate change impacts of flood mitigation is required.</p>
------------------------------	--

A healthier Denbighshire

Overall Impact	Positive
Justification for impact	<p>The strategy and action plan will aim to protect and restore existing nature spaces and create new ones.</p> <p>Access to local green space has been linked to better social outcomes around health and well-being.</p> <p>Spaces will aim to be restored and created via the use of volunteers.</p>
Further actions required	Need to ensure any green spaces created are designed with all users in mind including biodiversity.

Positive impacts identified:

A social and physical environment that encourage and support health and well-being	<p>The strategy and action plan will aim to protect and restore existing nature spaces and create new ones.</p> <p>Access to local green space has been linked to better social outcomes around health and well-being.</p>
Access to good quality, healthy food	Action may fall out of this work to increase use of allotments in schools and the use of this food in school catering.
People's emotional and mental well-being	<p>The strategy and action plan will aim to protect and restore existing nature spaces and create new ones.</p> <p>Access to local green space has been linked to better social outcomes around health and well-being.</p> <p>Carbon sequestration and biodiversity improvement work will involve volunteers. Volunteering and getting involved has been linked to increase sense of well being.</p>
Access to healthcare	There may be a reduction in health related issues as people are outdoors / social prescribing
Participation in leisure opportunities	<p>Carbon sequestration and biodiversity improvement work will involve volunteers- an active leisure option.</p> <p>The strategy and action plan will aim to protect and restore existing nature spaces and create new ones. This will aim to improve and offer more options for local green spaces for leisure.</p>

Negative impacts identified:

A social and physical environment that encourage and support health and well-being	Need to ensure any spaces for nature that are created are inclusive spaces and any anti social behaviour concerns designed out from the outset.
---	---

Access to good quality, healthy food	N/A
People's emotional and mental well-being	Need to endeavour to ensure spaces and views are protected that mean a lot to people. e.g. trees aren't planted which then block a cherished view. There could be a negative impact on those required to work from home as a result in reduction of office space/ location. Due to digitalisation of services there could be a negative impact on wellbeing due to less physical/ face to face contact, increasing social isolation.
Access to healthcare	N/A
Participation in leisure opportunities	Access for leisure needs to be balanced with requirements for land management of the space for biodiversity improvement.

A more equal Denbighshire

Overall Impact	Neutral
Justification for impact	Limited deliberative action on this wellbeing goal. However the strategy and action plan will have a positive influence in bringing about better outcomes for all people.
Further actions required	For the strategy and action plan to have more impact on this well-being goal we would need to increase its scope to include supporting the reduction of emissions from the county of Denbighshire as well as the County Council.

Positive impacts identified:

Improving the well-being of people with protected characteristics. The nine protected characteristics are: age; disability; gender reassignment; marriage or civil partnership; pregnancy and maternity; race; religion or belief; sex; and sexual orientation	Enshrined in the ethos of the strategy and action plan is for DCC to make its contribution to reduce further climate change which will be damaging to the wellbeing of all people but particularly those young people who will need to live with climate change impacts the longest. Enshrined in the strategy and action plan is taking a long term view.
People who suffer discrimination or disadvantage	N/A
Areas with poor economic, health or educational outcomes	The protection, restoration and creation of new green spaces in urban as well as rural locations will provide access to spaces for exercise and recreation. People in deprived areas will benefit from a reduction of travel and the conversion of miles into low carbon options will improve air quality and reduce congestion.
People in poverty	N/A

Negative impacts identified:

Improving the well-being of people with protected characteristics. The nine protected characteristics are: age; disability; gender reassignment; marriage or civil partnership; pregnancy and maternity; race; religion or belief; sex; and sexual orientation	If more services are digitalised, consideration would need to be given to accessibility to mitigate any possible negative impact for those with disabilities.
People who suffer discrimination or disadvantage	N/A
Areas with poor economic, health or educational outcomes	N/A
People in poverty	The strategy and action plan does not target carbon reduction/fuel poverty of those in private rented/social housing/privately owned homes.

A Denbighshire of cohesive communities

Overall Impact	Positive
Justification for impact	The development of the strategy and action plan has involved the public from the outset via the emergency declaration to the public engagement period in early 2020 and will be consulted on before taking to Council for approval. There is a active group of c.56 members of the public who are engaged on this agenda with regular 2 way dialogue with DCC. Increasing low carbon travel options and the quality and quantity of green spaces will have a positive impact on the attractiveness of local areas, connected communities and rural resilience.
Further actions required	Need to ensure no one is left behind in the shift to digitalised services.

Positive impacts identified:

Safe communities and individuals	N/A
---	-----

Community participation and resilience	<p>Development of the Climate and Ecological Change Strategy and Action Plan started in January with the public engagement period asking for the public's feedback on the Council's proposed net carbon zero and ecologically positive Council goals. Summary of the responses received can be accessed here:- https://countyconversation.denbighshire.gov.uk/uploadedfiles/Public%20Engagement%20Summary%20Report.pdf. The DCC Staff Council have been asked for their ideas. Workshops with each service area are taking place in June, July and August to gather ideas and information for policies and projects within each service function to support the Council in becoming net carbon zero and ecologically positive by 2030.</p> <p>The development of any Council wide strategy should provide the opportunity for public consultation, particularly on a topic of this magnitude. It is proposed that the final draft Climate and Ecological Change Strategy and Action Plan goes out to public consultation for 21 days during November. In light of COVID-19, the following is proposed:</p> <ul style="list-style-type: none"> • Online survey. Hard copies provided in libraries/one stop shops (if open). • Booked place drop in Q&A sessions at libraries/one stop shops (if open). • One booked place public meeting based in Council Chamber with heavily restricted numbers, pre submitted questions, on the night questions via twitter and webcasted. • Virtual presentations at pupil School Council and Youth Council/Parliament meetings. <p>The Council will continue to engage with the public proactively, constructively and sensitively on this agenda being very clear on the scope and scale of the Council's targets. This will be via online discussion forums hosted by the Council on our County Conversation platform and email digests to the 'green mailing group'</p>
The attractiveness of the area	<p>The strategy and action plan will target the protection, restoration and creation of 'green' spaces and the access to quality natural habitat across the whole of Denbighshire.</p> <p>The strategy and action plan is about reducing carbon from business travel, staff commuting and fleet- reducing miles travelled and converting as many miles to low carbon which will reducing pollution, improve air quality and reduce congestion.</p>
Connected communities	<p>The strategy and action plan may lead to projects relating to low carbon travel, e.g. bus provision/cycle ways, car share schemes across the county to encourage people out of their cars. However this is not confirmed.</p>
Rural resilience	<p>The strategy and action plan will target the protection, restoration and creation of 'green' spaces and the access to quality natural habitat across the whole of Denbighshire</p>

Negative impacts identified:

Safe communities and individuals	N/A
Community participation and resilience	There is a risk of not meeting public expectation on this agenda. Some sectors of the public would like DCC to be targeting reduction of the carbon emissions across the whole of Denbighshire as a county.
The attractiveness of the area	Need to ensure we have the capability and capacity to manage and maintain whatever we put in/install/create to ensure attractiveness for the long term
Connected communities	Need to ensure the staff and councillors feel connected even if there is more home working.
Rural resilience	As the Council continues to channel shift delivery to more online and less physical, need to make sure that broadband infrastructure is sufficient in all areas of the county to support this. As well as addressing any other possible barriers e.g. access to services, digital skillset.

A Denbighshire of vibrant culture and thriving Welsh language

Overall Impact	Neutral
Justification for impact	Whilst Denbighshire's natural environment is a big contributor to the culture and heritage of the county, the strategy and action plan will not deliver direct deliberative action to generate a vibrant culture or a thriving Welsh language.
Further actions required	Ensure a good amount of time is provided to support welsh translation of any technical/specialist terminology documents.

Positive impacts identified:

People using Welsh	N/A
Promoting the Welsh language	All literature, signage, information boards will be provided in both Welsh and English. Any public meetings will have bilingual slides and translator. Consultation/ Online forums to be carried out bilingually
Culture and heritage	Reducing the running cost of culture and heritage sites by reducing energy and fuel use will contribute to the financial viability of these sites/services. Protecting and restoring natures landmarks as part of this programme will support their availability for future generations.

Negative impacts identified:

People using Welsh	N/A
Promoting the Welsh language	Specialist terminology is sometimes difficult to translate.
Culture and heritage	Consideration needs to be given to what is and isn't permissible on buildings within conservation area.

A globally responsible Denbighshire

Overall Impact	Positive
Justification for impact	Our carbon footprint includes our supply chain and the strategy and action plan will target reduction of carbon emissions from our supply chain. This has the potential to stimulate local supply chains and provide local benefit. The programme will also look to leverage environmental benefit at the community level via Community Benefits process which will include the supported delivery of carbon sequestration and biodiversity enhancing projects. The delivery of the climate and ecological change programme will be done in collaboration with neighbouring authorities and partners where possible.
Further actions required	Need to ensure the climate and ecological change strategy and action plan is understood by our partners and neighbouring authorities so opportunities for collaboration are identified and progressed. Build in time for collaboration.

Positive impacts identified:

Local, national, international supply chains	<p>The strategy will target reduction of carbon emissions from our supply chain. This will lead to the development of low carbon encouraging specification for goods and services which will include transportation from point of origin to us as the client. This has the potential to stimulate local supply chains and provide local benefit.</p> <p>The programme will also look to leverage environmental benefit at the community level via Community Benefits process which will include the supported delivery of carbon sequestration and biodiversity enhancing projects.</p>
Human rights	<p>N/A</p>
Broader service provision in the local area or the region	<p>The strategy and action plan will help support the Public Service Board (PSB) in the delivery of their Environmental goals.</p> <p>The procurement service is a shared service with Flintshire County Council (FCC) and so work to decarbonise our supply chain can lead to more joint procurement and benefit in both counties.</p> <p>The strategy and action plan will provide the narrative on which to seek external funding which we can do collaboratively across the region.</p>

Negative impacts identified:

Local, national, international supply chains	<p>The focus on local supply chain may mean spend on more national and international supply chains will reduce.</p>
Human rights	<p>N/A</p>
Broader service provision in the local area or the region	<p>Collaboration can sometimes slow progress initially but can lead to better outcomes. Need to programme in time for collaboration.</p>
