

## Appendix 3:

### Risk Appetite : Classification and Description:

**Averse** is the avoidance of risk and uncertainty. We are therefore **not willing to tolerate any risk** within this appetite classification.

**Minimalist** is the preference for ultra-safe options that have a low degree of inherent risk and have a potential for only limited reward. Within this classification, we are willing to accept only **minor risks**.

**Cautious** is the preference for safe options that have a medium degree of inherent risk and may have some potential for rewards. In terms of our risk exposure rating, we would therefore accept a **minor or moderate risk**.

**Open** is the willingness to consider all delivery options and choose one that is most likely to result in successful delivery with an acceptable level of reward (and value for money). Within this, we will accept **minor, moderate and major risks**.

**Hungry** is the eagerness to be innovative and to choose options offering potentially higher business rewards despite greater inherent risk. All risk exposure is accepted within this classification – **minor, moderate, major and critical**.
