Summary of	For Parliamentary elections, to combine the 3 polling stations using Waen Parish Hall, Waen, into a single polling station for the
Response	three polling districts BKB, BKC and BKD. The electorate is low and (by combining the stations) would save having 3 polling stations
	in the one building. The Acting Returning Officer understands that the polling districts may need to have separate polling stations
	for local elections.
Returning Officer	Agreed. The combining for parliamentary elections of the 3 polling stations located within Waen Parish Hall would be a manageable
Comments	and efficient change that would not impact upon the voters.
	For elections involving more than 1 of the 3 community council wards the Returning Officer will consider retaining the existing separation of the polling stations in the building into their constituent polling districts.
	Should suitable buildings in convenient locations within each of the 3 polling districts be identified, their use as polling stations will
	be considered.
